Office Action Summary

Art Unit: 1638

The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 1638.

Please note: In an effort to enhance communication with our customers and reduce processing time, Group 1600 is running a Fax Response Pilot for Written Restriction Requirements. A dedicated Fax machine is in place to receive your responses. The Fax number is 703-308-4315. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Paula Hutzell, Ph.D., Supervisory Patent Examiner at Paula.Hutzell@uspto.gov or 703-308-4310. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

The Preliminary Amendment of 9 July 1999 has been entered-in-part. The amendment specified the cancellation of claims 32-35 and the addition of new claim 36. However, claims 32-35 were not present in the U.S. application, so they were not cancelled. New claim 36 was added and renumbered as claim 32 in accordance with 37 CFR 1.126.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Art Unit: 1638

Group I, claim(s) 1-11, 16-27 and 32, drawn to isolated nucleic acids encoding cassava starch branching enzymes and methods for their use to produce transformed plants with inhibited starch branching enzyme activity and altered starch.

Group II, claim(s) 12-15, drawn to isolated starch branching enzymes from cassava and a method for their use for in vitro starch modification.

Group III, claim(s) 28-31, drawn to isolated starch.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Salehuzzaman et al, cited by Applicants, teach an isolated nucleic acid encoding a cassava branching enzyme, which nucleic acid would encode an "effective portion" of the amino acid sequences of Figures 4 or 13, or a "functionally equivalent sequence". Thus, the claims do not constitute an advance over the prior art, and so do not constitute a special technical feature. Furthermore, the claims are drawn to at least two different genes encoding at least two different proteins, or any of a multitude of "functionally equivalent" sequences or "effective portion" thereof, and so are not drawn to a single special technical feature.

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and different functions.

Art Unit: 1638

The isolated nucleic acid molecules and methods for plant transformation of Group I, a first product and method of use, require isolated nucleic acids, methods for plant transformation and regeneration, each not required by any other group.

The isolated protein and methods for its use of Group II, a second product and method of its use, require isolated proteins and methods for cell-free in vitro starch modification, each not required by any other group.

The isolated, already modified starch of Group III, a third product, is not required by any other group.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and fields of search, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
